LOCATE 3.5G

RECOVER 3.5G

To find out which one is best for your business call at 1 866-276-5382

## NO GPS IS MORE RUGGED AND RELIABLE

All of our devices are engineered with industrial grade components. They are designed and manufactured in North America where we can control production and quality on site. Every single GPS we ship is subjected to over 100 separate quality tests.

## A SOPHISTICATED TURNKEY SOLUTION FOR MORE ACCURATE VEHICLE TRACKING

The IMETRIK GPS is a complete solution. We provide the global wireless device, user-friendly web-based software and control our own mobile network infrastructure. With twice the coverage, we can help you track your vehicles with speed and accuracy unmatched by any other GPS provider.

## UNPARALLELED CUSTOMER SUPPORT- ONE CALL TO IMETRIK RESOLVES ALL SYSTEM ISSUES

Call us. Someone will always answer. At IMETRIK there are no IVR systems. Our dedicated and knowledgeable Customer Support team is available from 8am to 8pm EST.

As a result, one call to a single vendor -- IMETRIK -- can resolve all system issues: device, software, and network. No more finger-pointing between multiple vendors, each saying your issue is the other one's fault!

Customer Support shares the same floor with our engineers and application developers. They all work as a team to assist you efficiently!

## INCREASE YOUR CASH FLOW AND REVENUE

### ONE-TIME PURCHASE PRICE, NO RENEWAL FEES.

At IMETRIK, your only investment in our GPS Tracking Solutions is a one-time up-front payment – which is a tiny drop in the bucket compared with the cost of the vehicle each GPS is protecting.

There are no renewal, transfer, or air-time fees ... no matter how many years you use our GPS solutions ... and no contracts. Just look how much money IMETRIK can help you save:

UNITS / MONTH	IMETRIK (Renewal fees)	COMPETITION (Avg renewal fees)	POTENTIAL SAVINGS! (Yearly)
5 units	\$0	\$13	\$780
10 units	\$0	\$13	\$1,560
15 units	\$0	\$13	\$2,340
25 units	\$0	\$13	\$3,900
50 units	\$0	\$13	\$7,800
75 units	\$0	\$13	\$11,700

## PROTECT YOUR VEHICLES AND YOUR CASH FLOW

Vehicles are worth thousands of dollars each. And with high-risk customers, more than half the loans default—the majority in the first year—causing major cash-flow problems. Past due accounts currently amount to \$3.8 billion.\*

Fortunately, an investment in IMETRIK GPS Tracking Solutions can protect your assets, help make sure your customers pay on time, and enable rapid, efficient collection and repossession with features like these:

- A GPS READING EVERY SECOND**  
 Vehicles can be quickly located in real time, every second, even in the harshest of environments, from the broiling deserts of New Mexico, to the frigid Canadian winters --and also in underground parking (last known position).
- MOST PRECISE GEOLOCATION**  
 IMETRIK devices are configured to receive simultaneous transmissions from a system of global satellites, so that you can pinpoint your asset's position with incredible precision, generally to within 12 feet of its location, not merely within 1 or 2 city blocks like other GPS providers.

Source: NIADA, 2014. Used Car Industry Report, p. 23

- TOW ALERTS**  
 Locates your asset at the exact street address of the impound yard to which it has been towed. This prevents the asset from being impounded for long periods and huge impound bills.

- PAYMENT REMINDER AND STARTER INTERRUPT**  
 Vehicles of your late payers beep loudly for half a minute each time the ignition is engaged – a warning that's impossible to ignore. And if that doesn't get your customers to pay, you can always use Starter Interrupt as a last resort.

- DAILY LOCATE**  
 Microsoft's Virtual Earth™ and orbiting satellites automatically provide automatic daily updates on each vehicle's position – enabling swift repossession for safe recovery of your assets.

- 10 REAL-TIME GEO-FENCES**  
 No GPS supplier offers more geo-fences than IMETRIK. For example, the geo-fences monitor unusual activity, such as when high-risk customers leave the state or country.

- DAILY HEARTBEAT**  
 A remote diagnostic that reports on the health status of the GPS device, Daily Heartbeat can indicate when there is a problem such as a malfunction or device tampering.

- QUICK AND EASY INSTALLATION**  
 With just a few wires to connect, the IMETRIK GPS device can be easily installed on average in 30 minutes or less.

- FULL DMS INTEGRATION**  
 Enables you to manage-with your preferred DMS - your assets more efficiently and with less labor.
