
7 UNSTOPPABLE FINANCIAL TRENDS

*That Can Make You
Rich in 2006*

PREFACE

by James Boxley Cooke, Honorary Chairman
The Oxford Club

Dear Friend:

It's ironic.

We are the world's largest financial fellowship – yet not one person in a thousand has ever heard of us.

James Boxley Cooke

We have thousands of members worldwide in over 100 countries – dwarfing other financial clubs in size and scope.

We spend almost a million dollars a year obtaining private research on behalf of our members – financial opportunities even Wall Street can't tell you about.

We have helped many ordinary men and women achieve unprecedented levels of wealth... amassing personal fortunes they never dreamt were possible before.

We have generated triple-digit gains on offbeat or arcane investments you won't read about in *The*

Wall Street Journal or *Money* magazine... including 221.18% on the world's largest commodity provider, 124.3% on a residential home builder, 262.2% from an online movie rental service, 187.78% on Mexico's largest retailer, and 293.9% on a major coal supplier to China.

We are *The Oxford Club*. And in this book, *7 Unstoppable Financial Trends That Can Make You Rich in 2006*, you will get an inside look at what one financial writer calls "the best-kept secret in financial clubs"... and an exclusive invitation to profit along with our membership.

You'll also discover seven unstoppable trends that are going to make a handful of savvy investors rich... and thousands of others poor.

Including:

- The secret "money migration" that's set off a monumental shift of \$100 billion in global capital... handing investors a "silver-platter" opportunity to pocket 10-to-1 gains (chapter 4).
- Don't speculate on oil and gas... when billions will be made on this energy alternative (chapter 5).
- While the war in Iraq and global terrorism have the U.S. on "Yellow Alert," our "anti-terrorism portfolio" generated cumulative gains of 635.25%

in just two and a half years (chapter 6).

- The “secret currency” strategy that makes money while the U.S. dollar sinks like a stone. It’s already garnered a staggering 4,000% for one man (chapter 1).
- How you could profit from the new bull market in Asia (hint: it’s NOT China)... and make 50% practically overnight (chapter 2).
- Why an aging population of baby boomers is triggering the greatest healthcare boom in U.S. history... and how you could profit handsomely (chapter 7).

We’ll share with you the best investment opportunities available today for protecting your wealth and building your profits as each of these seven “money mega-trends” unfolds.

You’ll also learn how you can join *The Oxford Club* on a special trial basis – and enjoy the best privileges of membership for just pennies per day.

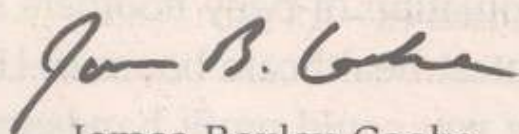

We are not an investment agency or stock promoter. There is no pooling of money. No management fees. No brokerage commissions...

What we offer is objective, independent research and analysis that brings you profit opportunities that will turn your friends and neighbors green with envy.

Whether you decide to consider *Oxford Club* membership or not, I urge you to set aside some time tonight to read or at least skim a good portion of this book.

I promise there is no more valuable – or profitable – reading you can do to make money and preserve your wealth in today's market.

Sincerely,

INTRODUCTION

by Alex Green, Investment Director, *The Oxford Club*

Our private organization – *The Oxford Club* – is extraordinarily discreet. We don't share the names of our members to anyone at anytime. We don't disclose the names of our contacts to non-members. We don't divulge to outsiders the investment intelligence we've gathered.

We don't reveal what we're recommending our members to buy. And we certainly don't tell what we're recommending our members to sell.

That hasn't stopped a lot of powerful people from trying to find out, however. Two Pulitzer Prize-winning journalists, Donald L. Bartlett and James B. Steele, editors-at-large for Time, Inc. investigated us and tried to expose some of the well-guarded secrets of the Club.

They failed utterly.

However, they did publish a book about the little they did learn. So this much – written by these Pulitzer Prize-winning investigative journalists – I

can share with you:

"One little known organization, The Oxford Club, occupies an elegant brownstone in Baltimore's historic Mount Vernon neighborhood, an architecturally rich area of museums, churches, restaurants, parks, and nineteenth-century townhouses.

The Club has its headquarters in a four-story, twenty-three room mansion at 105 West Monument Street. Built by a wealthy merchant on the eve of the Civil War, the townhouse abounds in exquisite architectural details: rich walnut paneling, ornate plaster molding, marble fireplaces, high ceilings. From this imposing base, The Oxford Club reaches out to thousands of members, most of them in the United States."

Given their flattering assessment, they were shocked to find us uncooperative. Why? Because you don't make millions by broadcasting what you're doing in the national media.

Frustrated by their inability to penetrate the veil that guards every aspect of our organization, these journalists conceded that we are masters at creating and protecting great wealth.

They noted, for instance, that we advise

members about “the steps necessary to create a fortress around their wealth.”

We also show members how to maintain complete privacy in financial dealings. We’ve gathered together a network of specially vetted financial experts who can show you how to protect your newfound wealth from tort attorneys, snooping neighbors, ex-spouses, potential litigants and, of course, the Internal Revenue Service.

If keeping your privacy high and your federal tax liabilities at an absolute minimum is a turnoff to you, you might as well stop reading now.

You see, our organization makes a specialty of creating millionaires and multimillionaires. But it takes a special sort of person to appreciate what we do. You can’t learn these proprietary money-making techniques from your friends and family, or *Money* magazine, or a consultation with a broker at Smith Barney.

Our organization consists of well-connected individuals who are willing to share close-to-the-bone intelligence so that members can create legacies of wealth for their families. (As I often say, “Rich people plan for three generations; poor people plan for Saturday night.”)

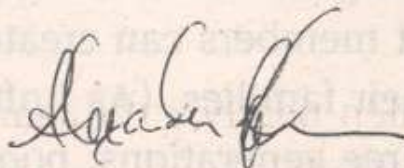

Perhaps some day you too will have special knowledge that you might share with us. I hope so.

That's one of the reasons we've published this book and sent a complimentary copy to you.

Rest assured, our recommendations don't ask you to take big risks. (You'll soon learn that wealthy individuals don't take foolish chances. Quite frankly, we don't have to.) Instead, by selectively picking and choosing only investment plays that offer much-higher-than-average rates of return, we're teaching members how to build a legacy of great wealth safely, reliably... and consistently.

I hope you're sitting in an easy chair. Because you're about to connect with a group of high-powered individuals with a combined net worth of several billion dollars. In effect, I'm going to take you behind the velvet curtain...

This is our unique proposition: We have battle-tested, proprietary investment systems. We don't share them with outsiders. This invitation is your chance to become one of the insiders who is creating, protecting and enjoying legacies of great wealth.

A handwritten signature in dark ink, appearing to read 'Alex Green', with a stylized flourish at the end.

YOU CAN'T AFFORD TO MISS...

"7 UNSTOPPABLE FINANCIAL TRENDS THAT WILL MAKE YOU RICH IN 2006 & 2007"

"May you live in interesting times," says an ancient Chinese proverb. And economically, 2006 & 2007 promises to be the most interesting – and turbulent – year of the new decade.

Massive economic growth in China, a declining dollar, continued war in Iraq, ongoing fears of terrorism, natural disasters, record prices at the gas pump, an aging U.S. population, and a global energy crisis – it all adds up to a massive shift in the flow of wealth both in the U.S. and worldwide.

But the good news is: hidden in each threat is an opportunity for profit – and in this book, *7 Unstoppable Financial Trends That Will Make You Rich in 2006 & 2007*, you'll discover how the coming months can make you rich while other investors watch helplessly as their portfolios continue to stagnate or even shrink.

IN THESE PAGES, YOU'LL FIND:

- The secret "money migration" that's set off a monumental shift of \$100 billion in global capital ... handing investors a "silver-platter" opportunity to pocket 10 to 1 gains (chapter 4).
- The coming of "E-day" – and how to hedge your portfolio against rising and falling oil price shocks (see chapter 5).
- While the War in Iraq and global terrorism have the U.S. on "Yellow Alert," our "anti-terrorism portfolio" generated cumulative gains of 483.16% in just 2 years (chapter 6).
- Why the U.S. dollar is about to take another big hit (chapter 1).
- How you can profit from the new bull market in Asia (hint: it's NOT China) and make 50% practically overnight (chapter 2).
- Why an aging population of Baby Boomers is triggering the greatest healthcare boom in U.S. history – and how you can profit handsomely (chapter 7).

In total, more than a DOZEN opportunities to earn gains of 50% – 75% – even 100% or higher over the next 12 months!
