

# Weight Loss Just Got SUPER EASY!

## Introducing SUPER SLIM the NEW weight loss SUPER FOOD

**A**n extract derived from a West African fruit may help overweight people shed pounds a new study suggests. Known as "African Mango," *Irvingia Gabonensis* has shocked the medical community with its ability to help those who consume it lose weight fast.

Lab research has shown that extracts from the plant's seed may inhibit body fat production. Overweight people taking an extract of the fruit shed inches of belly fat and lose weight, all without dieting or exercise.

**In one clinical trial\*, patients taking African Mango extract lost an average of 5½ kilos in 30 days.**

The group taking African Mango extract lost up to 18 times more total body fat than a control group taking a placebo.

Researchers were so amazed by the performance of this weight-loss wonder fruit that they repeated the experiment to verify results. **In this second trial, patients taking *Irvingia* lost an average of 12½ kilos in 10 weeks.**

### THE LEPTIN CONNECTION

How it works: your body makes a protein called Leptin that controls your weight

naturally by burning fat and reducing your appetite.

But when we accumulate too much body fat, the fat cells make an inflammatory compound called C-reactive protein (CRP). CRP leads to a condition called Leptin resistance. The Leptin simply stops doing its job. We gain weight and accumulate belly fat.

*Irvingia* naturally eliminates Leptin resistance by reducing CRP levels.

**Result: the Leptin in your body does its job unimpeded. It curbs your appetite – and burns fat – more efficiently.** You don't feel hungry... and you lose weight without struggle or starvation.

African Mango also increases your level of the hormone "adiponectin," which is vital for maintaining an optimal fat-burning metabolism. Increasing adiponectin boosts fat oxidation and burning.

An enzyme called glycerol-3-phosphate dehydrogenase (GPD) increases both the size and number of fat cells in the body. African Mango inhibits the production of GPD, thereby reducing the amount of glucose that is converted into body fat.

Another enzyme, amylase, breaks down carbohydrates in your digestive tract.

African Mango helps get rid of amylase. By doing so, it prevents carbs from being absorbed as sugar and stored as body fat.

### A SUPER FOOD!

**Our new SUPER SLIM formulation gives you 3,000mg of *Irvingia* daily. That's the optimal dose for rapid weight loss.** SUPER SLIM's *Irvingia* Gabonensis comes directly from the rain forests of West Africa. A limited supply is set aside for the manufacture of SUPER SLIM while the growing season lasts.

But SUPER SLIM is also a complete "super food," rich in vitamins, antioxidants, and other nutrients your body needs to stay healthy as you take off the weight, so you can save money on having to buy a multi vitamin. SUPER SLIM does the lot!

The SUPER SLIM formula also gives you 100mg of Dandelion Leaf, 100mg of Chia Seed, rich in Omega 3 and 6... 100mg of Alfalfa... 25mg Goji Berry extract... 100mg of Spirulina... and more.

Other ingredients in the SUPER SLIM super food include Flaxseed, Psyllium Husk, Thiamin, Vitamin B12 for energy, and weight-loss mineral Chromium Picolinate.

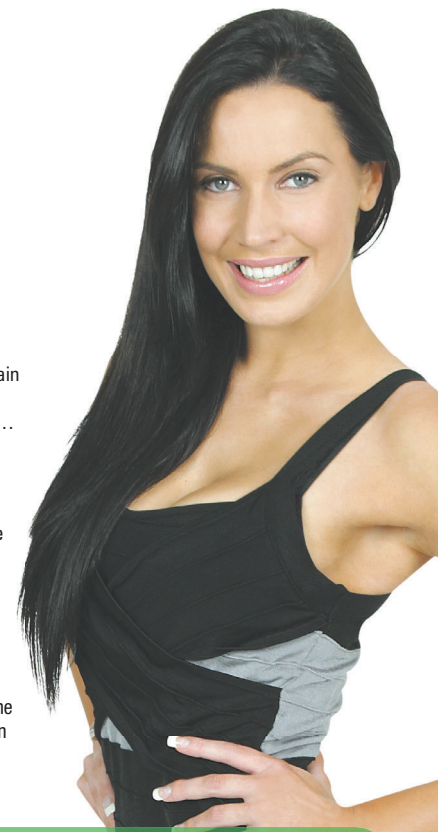

Losing weight with SUPER SLIM is easy. Just stir a tablespoon into a glass of water

for a delicious and nutritious health shake. Drink 30 to 60 minutes before lunch and again before dinner. It tastes great and you'll feel full even before you eat your first mouthful... and as a result you'll eat less.

**Nothing could be easier. You just drink SUPER SLIM twice daily.** It tastes great. And it turns off your appetite as easy as flipping a switch. Your food cravings vanish.

### HURRY ONLY LIMITED STOCK AVAILABLE

It is anticipated that all stock will sell out quickly. If you can't find Super Slim at one of the stores listed below, call us for more information at 1300 545 489 today.

*"On SUPER SLIM I lost 15kg in only 10 weeks without having to do anything. No exercise or gym workouts. SUPER SLIM did all the work for me."*
