The Midsize Corporate Jet that's Changing Business Aviation

- The only midsize jet with digital flight controls (fly-by-wire)
- Remarkable performance
- Unmatched passenger range and comfort

Designed from the ground up as a game-changing, midsize business jet, the Legacy 500 isn't compromised by cost and outdated concepts. Based on extensive customer input, the Legacy 500 incorporates innovative solutions for performance and comfort with the latest technologies from flight deck to passenger cabin.

Get the facts now on the Legacy 500 by filling out and submitting the form at right.

A flight deck of the future

Request more information
The Legacy 500’s spacious flight deck features a remarkable design, focused on ergonomics and pilot comfort. The cockpit is clean, and the throttle sticks allow for a clear, uninterrupted view of the large displays. Their wireless short-hauls and reduced workload. And you'd be impressed by the large windows and improved visibility from this flight deck.

Bleeding-edge avionics
The Rockwell Collins ProLine Fusion integrated avionics system showcases some of the most advanced avionics available in business aviation today. They include four high-resolution displays, synthetic vision system for enhanced safety, graphical flight planning with advanced flight management systems, Enhanced Vision System (EVS) for increased situational awareness, Surface Management System (SMS), and more.

Advanced digital flight controls
The Legacy 500 is the only jet in its class to upgrade the conventional flight controls to digital technology. The fly-by-wire systems offer complete envelope protection, preventing commands that exceed the jet's structural limits. It also puts the pilots in more control and helps reduce their overall workload. And everyone enjoys a smoother flight experience.

Cabin comfort unmatched in its class
At 5 feet (1.52 m) tall with a flat floor and 27.6 feet (8.40 m) long, the Legacy 500’s cabin is the largest in its class. Four pairs of facing seats convert into fully flat beds that let you sleep soundly on overnight missions. The seats are available with optional heating and massage, adjustable and forward movement. The aircraft seats up to 12 passengers. An entry side and a window, the largest in its class, enhances the view or work by natural light.

Hold everything you want to bring
At 110 cubic feet, the Legacy 500’s main baggage compartment is the largest in its class. The aircraft also provides a generous in-flight accessible baggage compartment and cabin storage space.

Luxury in flight
The Legacy 500 has a full wet galley, including hot and cold water, a large ice drawer; storage for optional oven; icemaker; microwave oven; refrigerator. Your passengers will be well-entertained and well-fed wherever you fly. The Citation Select Cabin Management System gives you full HD video, optional surround sound, and a wide range of connectivity options including 3.1 Mbps high-speed data and Wi-Fi connection.

Plus, the Legacy 500 gives you:
- High-speed cruise: 466 km (290 mph)
- Range: 3,125 nm (5,788 km)\(^{1}\)
- Cabin pressurization: 6,000 ft - best in class.
- Large windows in the lavatory – unique in its class.
- Maximum operating altitude: 43,000 ft (13,116 m).
- Maximum payload: 2,800 pounds (1,270 kg).
- Takeoff distance: 4,094 ft (1,240 m)\(^{1}\).
- Maximum cruise thrust: 5,543 lb.
- Support from a top-rated Customer Support and Services Team.
