

As seen on TV! Throw away your dentures now!

Good news about a painless alternative to dentures that will make you smile!

A remarkable innovation in restorative dentistry can produce a beautiful smile for life, improve oral health and give you 9x stronger chewing capacity than dentures.

But you have to act now. Here's why....

It's every denture wearer's dream: to pick up a delicious apple, a juicy steak or a cob of corn and bite right into it without worrying about dislodging or breaking your false teeth.

And having to wear dentures is many people's fate. Tooth loss with age is common, and 25% of adults eventually lose some or all of their teeth.*

Well now Sydney-based pioneer in restorative dentistry Dr. F. Yassmin can make that dream of sturdy, beautiful teeth come true for you thanks to a new and improved dental implant system available only to a limited number of patients this year.

The system, called *All on 4*, incorporates a titanium framework supporting teeth formed from

a unique resin blend on acrylic gums. Scientifically calibrated positioning of the implants provides maximum support and strength.

The result: a perfect mouth full of straight teeth that are indistinguishable from natural teeth but remain bright white and never turn yellow. And with 9 x greater chewing capacity than dentures.

So you can smile and talk with pride and confidence and eat all the foods you love without worrying about your teeth coming loose.

Become denture-free for life

If you want to avoid dentures, you're not alone. They're a hassle to put in and take out and easy to misplace. Wearing dentures prevents you from eating many of your favorite foods. Denture wearers frequently experience dry mouth, breakdown of gum tissue, yeast infections, speaking problems, and even sores.

At *Denture Free for Life* our system eliminates these unpleasant and embarrassing issues. Dr. Yassmin's custom

See the amazing before and after shots from Dr. Yassmin's clients at *Denture Free for Life*. The *All on 4* system is a new and improved dental implant system that can make your dream of sturdy and beautiful teeth come true! But be quick, it's only available to a limited number of clients this year. Call now on 1800 998 329.

solutions look and feel just like your own teeth. And the perfect fit means you can speak clearly without embarrassment.

Because the *All on 4* system is a fixed system, these implants eliminate the discomfort and headache of removable dentures. Dr. Yas-

min's *Denture Free for Life* patients report they can eat what they like with confidence and without pain.

Act now before it's too late

Without enough natural teeth or dental implants, progressive bone loss causes your jaw to shrink and your face to sag. Soon you won't have

enough bone left to support dental implants and the *Denture Free for Life* system. Act now before you reach that point. Because once you do, it's too late.
