EPH-BOMB EXTREME THERMOGENIC

Drop the EPH-Bomb!

This Hot New Thermogenic Will Blow Your EPHing Mind!

No supplement on the market today can empower you to beast it up in the gym like EPH-Bomb. It's like turbo-charging your muscles with the power of a thermonuclear reactor!

For thousands of years, the powerful "thermogenic" herb **ephedra** has been used to naturally accelerate human metabolism. Incredibly, **EPH-Bomb** can actually increase the heat in your body -- and boost energy by oxidizing fat more efficiently.

EPH-Bomb truly is "the bomb" of workout energy enhancers! *It literally ramps your metabolism up to maximum overdrive!*

And ... while EPH-Bomb is a workout stimulator, and not a diet supplement, it also helps control your appetite – so you can start cutting it up at your very next workout.

The Science & Technology Behind EPH-BOMB

Our EPH-Bomb enhances the shredding effects of **ephedra** by adding stinging nettle root extract to the formula.

EPH-Bomb also contains yohimbine, a bark extract which gives you an even bigger energy surge -- by pumping more adrenaline into your bloodstream!

Best of all, EPH-Bomb uses a form of clinically proven ephedra leaf extract that is 100% legal. It's approved by the FDA and totally safe – and not the dangerous "alkaloid" extract from the plant stem once used irresponsibly in banned weight loss supplements.

So you get the energy boost and appetite control of ephedra ...
