SurfControl®

Upgrade from Websense to **SurfControl** – and save over **40%**!

Just provide us with proof of ownership for Websense or any other Web filtering system – and we'll give you SurfControl Web Filter **FREE**!

You get the complete SurfControl software - without paying a dime. Your only expense: the URL category list and maintenance. You save over **40%** vs. what other new SurfControl users pay for the same system.

That means you can upgrade to SurfControl Web Filter ... at a savings of thousands of dollars!

And every year you'll continue to save, since Websense forces you to buy new software each year ... and SurfControl doesn't **(see reverse side for more advantages of SurfControl vs. Websense).**

Special FREE Trade-In Offer for Websense users!

SurfControl®

Special FREE Trade-In Discount!

Now you can upgrade from Websense to SurfControl – and get all these advantages...

1. SurfControl's "Follow-Me" ***Mobile Filtering*** technology enables you to monitor and control employee access to the Web wherever they go. That means you can enforce your company access policy from every machine your employees use – not just the ones in your office.

2. ***Pass-through*** filtering platforms ensure compatibility with all of the major security platforms: Blue Coat ProxySG, Check Point Firewall-1, Microsoft ISA, Novell BorderManager, Intrusion PDS, Cisco Content Engine, Windows 2004, and Juniper Networks. We also offer platform-independent ***pass-by*** filtering technology. And you can change software platforms at no extra cost.

3. SurfControl provides content filtering for all Internet access points – the Web, e-mail, instant messaging (IM), and peer-to-peer file sharing (P2P). Websense, by comparison, doesn't provide filtering for e-mail. Which means no protection against spam and phishing!
