Six Ways You and Your Company Will Benefit From a Subscription to MODERN PLASTICS INTERNATIONAL

- 1 ***You will stay ahead of your competitors.*** MPI keeps you up-to-date on important industry news and information including prices, capacities, mergers, and more.
- 2 ***You will boost productivity.*** MPI brings you engineering and technical breakthroughs – including new processes, machine designs, tooling, and materials – that can help you produce more parts per hour while maintaining superior quality.
- 3 ***You will cut manufacturing costs.*** MPI regularly reports on advances in processing, computerization, and resin formation that can help lower your operating costs.
- 4 ***You will preserve and expand your market share.*** MPI points you toward lucrative expanding and new markets, showing you where demand is greatest and profit opportunities exist.
- 5 ***You will make more money, and your company will thrive.*** MPI keeps you at the forefront of the global plastics industry with the latest news on industry people, companies, ventures, distributorships, price changes, supply developments, milestones, and transitions.
- 6 ***Your job security and career advancement will be assured.*** MPI has been helping plastics professionals be more successful for over a quarter of a century.

World plastics consumption is predicted to reach 136 million metric tons per year by 2000. MPI can help ensure you get your share of this booming market!

Dear Plastics Professional:

The demand for plastics is greater than ever. But so is the competition.

Your competitors are increasing production capacity. And new plastics companies are starting up weekly.

The question is: How do you keep *ahead* of this growing competition...and maintain your market share, revenues, and profitability throughout the rest of the 1990s...and beyond?

The solution: Modern Plastics International – the leading source of business, market, equipment, materials, processing, and technology information for global plastics professionals.

**MODERN PLASTICS INTERNATIONAL...
the plastic industry's global source of business intelligence**

Unlike other plastics publications, which focus either on North America or just the country in which they are published, Modern Plastics International provides coverage of the plastics industry worldwide. That is essential, given the fact that two out of every three metric tons of plastic is produced *outside* North America – in Europe, Asia, Africa, the Mideast, and Latin America.

Modern Plastics International is published monthly by The McGraw-Hill Companies. With the largest and most experienced staff of journalists and editors in the plastics industry, MPI has a network of bureaus and correspondents around the globe, reporting monthly on key plastic industry trends, end-user markets, technical advances, and process innovations throughout the world.

Who should subscribe to MPI?

MPI is designed and edited to meet the complex technical and business information needs of corporate officers, production managers, design engineers, researchers, and other process directors and decision makers in the global plastics industry.

As one of our editors explains, "MPI achieves this objective by presenting a well-balanced blend of plastics industry global developments, design and process innovations, materials updates, new production ideas, advances in machinery and equipment, market insights, business news, and more."

Plastics Professionals Worldwide Praise MODERN PLASTICS INTERNATIONAL...

"Provides comprehensive information. It always keeps me up-to-date with developments in the plastics market worldwide."

President,
Union Chemical Ind.
Co., Ltd., TAIWAN

"Clearly presented, easy-to-read, and valuable articles. I particularly like the follow-up on product developments and the market/pricing overview."

Operations Manager,
BP Chemicals, BELGIUM

"A valuable magazine to maintain useful and updated information on new technologies, market trends and prices."

Plastics Engineer,
Union Carbide, VENEZUELA

"A very good and quick means of keeping up-to-date on new materials. Unlike some other publications where 'new' means new to them, but I already know about them."

Technical Services Manager,
G.P.G. International, ENGLAND

"The best publication in its field. Quick, complete and good information. Excellent reports – particularly the statistics."

Marketing Manager,
Plexi S.A., SPAIN

"Nearly all sections of the magazine – particularly design and application news – are very beneficial to me, and I get a lot of information from this publication."

Managing Director,
Woo Young Co. Ltd.,
SOUTH KOREA

MODERN PLASTICS INTERNATIONAL...READ IT AND PROSPER.

The Modern Plastics International Buyers' Guide...and the Modern Plastics Encyclopedia Handbook... Yours FREE with your paid subscription to **MODERN PLASTICS INTERNATIONAL**

INTERNATIONAL BUYERS' GUIDE

This comprehensive guide to the worldwide plastics business, is included in the August issue at no extra cost with a subscription to MPI. Stay in touch with suppliers, resources, technologies, and methods that can help you cut costs, enhance quality, increase throughput, and find lucrative new markets for the plastics products you make.

The Buyers' Guide is the most complete worldwide directory of suppliers of primary processing equipment, machine and system components, tools, auxiliary equipment, resins, chemicals, and additives in the plastics industry.

Here you will find detailed information on where to get the most competitive prices on the best materials and equipment for every plastics process including:

- Injection molding • Extrusion • Blow molding • Thermoforming • Foam processing
- Reinforced plastics processing • Compounding • Film converting

Just one good purchase from the International Buyers' Guide can pay back the cost of your MPI subscription hundreds of times over!

You also receive the MODERN PLASTICS ENCYCLOPEDIA HANDBOOK

Taken from the pages of MODERN PLASTICS ENCYCLOPEDIA, this comprehensive 250+ page book covers most of the major topics in plastics technology today including: applications; characteristics and properties of materials; performance information and data; manufacturing techniques; design considerations; commercial uses of plastics; and materials standards. Contributions are from over 200 of the top plastics experts in the field.
